Professional Summary

Passionate Python and Django developer with hands-on experience building responsive, database-driven web applications. Skilled in Bootstrap, Tailwind CSS, Git, and PostgreSQL. Strong understanding of web architecture, RESTful APIs, and clean code principles. Seeking backend-focused opportunities to contribute to impactful projects

Education

B.A. (Hons) English – School of Open Learning, Delhi University   2024

Projects

Medium Clone   06/2025 – 07/2025   – Dj

- Built a Medium-style blog app with user authentication and profiles
- Integrated Editor.js for rich-text post creation with image support
- Added comment system and secure CRUD functionality
- Designed a responsive UI using Bootstrap
- Used PostgreSQL for scalable models and deployed with production settings

Django To-Do App   06/2025 – 06/2025   – Dj

- Built a responsive To-Do app for daily task management
- Implemented task creation, editing, and deletion
- Used Django ORM with SQLite for backend logic
- Styled minimal UI with HTML, CSS, and Bootstrap
